

## PROJECT LOGISTICS AND FORWARDING ACTIVITIES

Fagioli is a primary international company specialised in world-wide forwarding activities as well as heavy transport, heavy lifting, logistics and related engineering and door-to-door project cargo shipping.

Fagioli forwarding activities involve, between others, ro-ro operations, air transportation, door-to-door project cargo, humanitarian logistics support. The use of company owned containers, normal trailers and specialised transport up to and including roll-on/roll-off operations insures that the material is delivered no matter what logistics difficulty may face them.

Fagioli's project cargo and forwarding specialists are well aware of the logistics and co-ordination involved in organising the pick-up, transport, appropriate documentation, custom operations, deadlines, performances and delivery tasks.

Integrated networking services allow each project co-ordinator to assign various portions of the project to different operatives, who individually monitor their section of the operation. The company's traffic department in conjunction with the project co-ordinator keeps abreast of cargo status, providing current information on material condition and whereabouts.

The Fagioli Group, being a unique project specialist with own equipment, offer the full range of forwarding activities like overland transport of "in-gauge" goods with international forwarding door to door, air-freight, heavy transport, heavy lifting, assembly and erection, heavy ocean transports by means of own pontoons, barges and heavy lift vessels. In addition there are business divisions within the group owning and operating our own warehouse facilities and vehicles for logistic services.

The services offered by Fagioli organisation include, among others the complete door-to-door transport of project cargo and international Freight Forwarding.

Fagioli group is present on a worldwide basis through its branches and established network of qualified agents. Fagioli is in close relationship with national and international shipping companies either for containers and conventional cargo transports. Fagioli coordinates and controls all the shipping / documentation stages. Fagioli team has the "coordination skill" to find new solutions and being flexible in fitting with the continuous evolutions of forwarding market requirements.

Additional specialised services: group owned heavy transport and lifting, fluvial and maritime equipment to perform any kind of transportation with a long-standing experience .

## RO-RO AND OVERLAND ACTIVITIES

Ro-ro operations: leaning on the main ports and utilizing the primary shipping companies using ro-ro ferry-boats, we can rely on weekly sailings in order to limit the trailers waiting at the port to a few days, sometimes even to only 24 hours from the arrival. Albania, Greece, Tunisia, Libya and Algeria are the most relevant markets references, even though Fagioli is active in other countries.

The embarking operations (towing semitrailers on board of the vessel, perfecting exit visas, and everything else necessary) are completely followed by our harbour agents. Upon arrival of the vessel at port, semitrailers are towed to the ground and stored in our harbour terminals, where transit formalities are issued. Our local organization takes care of all operations.

## AIR TRANSPORT

Fagioli Group is a registered IATA member. The major objective is to ensure that all airline traffic moves with the greatest speed, safety, convenience and efficiency - and with the utmost economy, anywhere in the world. Fagioli, with its relevant and wide range of equipment, provides a complete door-to door service from point of origin to the closest airport and after the air transportation till the point of destination, anywhere in the world thanks to a dedicated and dynamic "Airfreight Department" which works in close collaboration with all the other commercial and operative offices.

## STORAGE & WAREHOUSING

With regard to storage and material handling, warehouse logistics services represent another relevant and important aspect of Fagioli Group activities. Fagioli is in a unique position to grant Integrated solutions of transport lifting and storage of any kind of material.

- Strategically positioned warehouses in several locations in Italy and around the world
- Group-owned equipment to pick up, collect, distribute and unload the goods
- Inspection of material while in / out-transit to keep the client informed of possible damages
- Additional packaging/markings specially made upon client requests in order to save material from any voyage adversity
- Taylor - made order preparation for delivery material and goods at client request
- Computer system to check and analyse the best storage solutions

## PROJECT FORWARDING FOR THE HUMANITARIAN AID

The Fagioli Group are specialists in the transportation of relief cargo to destinations throughout the world. The company can call on many years experience in commercial shipping to provide expert advice on all aspects of aid forwarding and emergency service. Combining this experience and the use of group owned trailers and equipment, Fagioli is almost in a unique position in understanding and providing the most efficient service to our clients. The results and successes obtained during last years gave us the opportunity to become registered suppliers of International Humanitarian Organisation for logistical activities (such as U.N., Red Cross....). In order to realise the cost effectiveness in the procurement and delivery of Aid & Relief Shipments and Emergency services, Fagioli has established a specialised unit to support government and non-governmental organisations in the humanitarian aid services.
